

## WellPoint Prescription Drug List

Some prescription drugs may result in higher out-of-pocket costs for you and your family. This list may help you lower those drug costs. You can use this list to determine into which prescription drug tier a specific drug belongs. This list displays brand name drugs that are in the preferred brand tier, or tier 2, of your prescription drug plan. The list is sorted alphabetically by the brand name. If a drug appears in the "Brand Name" column, it is covered under tier 2. If a brand name drug does not appear in the "Brand Name" column, it is covered as a non-preferred brand drug, within tier 3. Finally, generic drugs are covered under tier 1.

These preferred brand name drugs have a higher copay than the generic alternative, or tier 1, listed in the 2nd column. If you, or any covered family member, are currently taking a higher-cost preferred brand drug on this list, you may wish to speak with your doctor if this is appropriate for you. If an over-the-counter (OTC) drug is not appropriate or available, you can present this list to your doctor to determine if a lower cost generic drug will meet your needs.

As always, your doctor is best qualified to balance effectiveness with cost considerations in selecting a prescription drug. The final prescription decision rests with your doctor; changing to a lower cost drug is voluntary. If you have any questions, please contact Wellpoint Pharmacy Management Customer Service at 866-841-8951.

BRAND NAME	GENERIC NAME	DOSAGE FORM	STRENGTH
8-MOP	METHOXSALEN	CAPSULE (HARD, SOFT, ETC.)	10 mg
